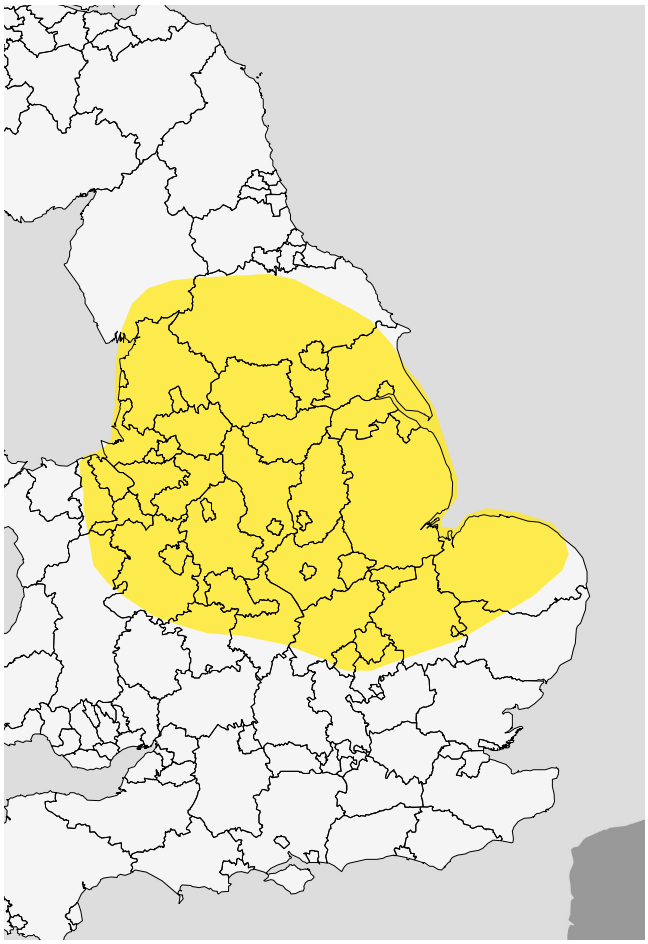
Yellow warning
Thunderstorm

Between
12:00 Sun 26 May 2024 and
20:00 Sun 26 May 2024



Slow-moving heavy showers and thunderstorms may cause flooding and disruption in places

What to expect

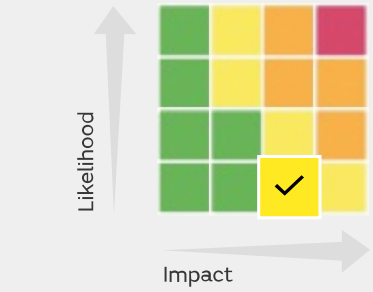
- There is a small chance that homes and businesses could be flooded quickly, with damage to some buildings from floodwater and lightning strikes
- Where flooding or lightning strikes occur, there is a chance of delays and some cancellations to train and bus services
- Spray and sudden flooding could lead to difficult driving conditions and some road closures
- There is a small chance that some communities become temporarily cut off by flooded roads
- There is a slight chance that power cuts could occur and other services to some homes and businesses could be lost

Further details

Slow-moving showers and thunderstorms are expected to develop during Sunday afternoon. Rainfall accumulations will vary significantly across the warning area but where showers become organised, there is the possibility of 20-30 mm of rain falling in an hour or less. Frequent lightning and hail (particularly in the east of the area) may also cause impacts.

What should I do?

Consider if your location is at risk of flash flooding. If so, consider preparing a flood plan and an emergency flood kit.



Very low likelihood of medium impacts

Yellow warning
Thunderstorm

Between
12:00 Sun 26 May 2024 and
20:00 Sun 26 May 2024

Further Details (continued)

Prepare to protect your property and people from injury. Before gusty winds arrive, check to ensure moveable objects or temporary structures are well secured. Items include; bins, garden furniture, trampolines, tents, gazebos, sheds, and fences.

Give yourself the best chance of avoiding delays by checking road conditions if driving, or bus and train timetables, amending your travel plans if necessary.

People cope better with power cuts when they have prepared for them in advance. It's easy to do; consider gathering torches and batteries, a mobile phone power pack and other essential items.

If you find yourself outside and hear thunder, protect yourself by finding a safe enclosed shelter (such as a car). Do not shelter under or near trees, or other structures which may be struck by lightning. If you are on an elevated area move to lower ground.

Be prepared for weather warnings to change quickly: when a weather warning is issued, the Met Office recommends staying up to date with the weather forecast in your area.
